EDUCATION

Bachelor's Degree in Design 2018 - 2022

Indian Institute of Technology, Guwahati, IND

B.Des - 8.5 CPI; majoring in a cross-disciplinary, non-specialisation based design course with a focus on industrial and tangible product design.

Higher Secondary (12th) 2016 - 2018

St. Claret P.U. College, Bengaluru, IND

CO-CURRICULARS

Marketing Head, Ishanya, Annual Design Fest, IITG

Jan 2019 - May 2021 | Department Team

Media Head, IIT Guwahati Model United Nations

Oct 2018 - Mar 2021 | University Team

Core Team Member, Creatives, Techniche IITG

Oct 2018 - Oct 2020 | University Tech Fest Team

SKILLS AND INTERESTS

Proficiencies

Sketching and 2D rendering, rapid prototyping and testing, 3D modelling and visualisation, creative ideation and problem solving, design for manufacturing, stakeholder management and networking. I also love dabbling in 2D/3D motion graphics, as well as photography and videography.

Ideology

I have a keen eye for crafting tangible products that integrate technology with hands-on functionality; striving to develop services that converge at the intersection of sustainability, innovation and accessibility.

EXPERIENCE

INDUSTRIAL DESIGNER

JIO PLATFORMS, RELIANCE

JUL 2022 - PRESENT

NAVI MUMBAI, IND

Working with the Devices Design Team at Jio in building tangible user interfaces that help bridge the gap between the next billion users and their access to hands-on technology. From research and conceptualisation to production and development, the work encompasses all aspects of creating a product line from the ground up.

PRODUCT DESIGN INTERN

WORKBENCH PROJECTS

MAY 2019 - JUL 2019

BENGALURU, IND

Worked on multiple projects for clients of the firm, spanning CNC machining and wood working, pottery prototyping for urban farming solutions, designing and branding of a community fridge initiative, and curating a design thinking course for schoolchildren.

FREELANCE MOTION DESIGNER

BULLIEVERSE INC.

JUL 2021 - FEB 2022

Worked as a motion designer for Bulliverse, a Web3 based startup working across the metaverse gaming and crypto-currency domains.

PROJECTS

JioPhone, JioBharat - Jio Devices Design Team

Ongoing work at Jio Platforms Limited

Worked on the conceptualisation, design and development of the JioBharat and JioPhone lineup of products that are currently in the Indian market, and multiple other devices in the pipeline. The work also involves defining guidelines and establishing a brand identity for the products, aligning with the company's initiative to create devices that assist in digitising the millions of non-digitised users across the country.

Graduation Project - with Samsung Electronics

with Dr. Pankaj Upadhyay, Department of Design, IIT Guwahati

Worked on a two semester-long project (Jun 2021 - May 2022) involving research and study on Expansion Mechanisms and Deployable Structures, majorly focusing on compliant mechanisms, and their applications on daily use products.
